STAKING REWARDS

Proof of stake blockchains like Solana work differently to proof of work blockchains like Bitcoin. In simple terms, adding new blocks to the blockchain requires existing holders to 'stake' their cryptocurrency. In return for staking, they are rewarded with cryptocurrency from that same blockchain.

CoinShares' Staked ETPs are built to allow the Issuer to share staking rewards with investors in two ways:

- The Issuer can reduce the management fee;
- The Issuer can also increase the Coin Entitlement of the ETP each day, as staking awards accrue.

For CoinShares FTX Physical Staked Solana, the Issuer will share staking rewards as follows:

Product	Management Fee	Staking Reward
CoinShares FTX Physical Staked Solana	Reduced to 0.0% p.a.	3.0% p.a. (accrued daily)

Note that staked coins do not move from the secure custodian where they are stored, and the ETP remains 100% physically backed at all times.

The CoinShares Group earns fees for services performed for the Issuer as well as any extra return earned from staking above the Staking Rewards for investors.
