You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type	This product, collectively referred to as Digital Securities, is a non-interest bearing, secured, undated, limited recourse debt security that is fully secured by the underlying Tezos. Digital Securities are listed on the following stock exchanges: SIX Swiss Exchange (primary listing) and Frankfurt Stock Exchange (XETRA); but it may be listed on additional exchanges and Multilateral Trading Facilities.
Term	Digital Securities do not have a fixed maturity. A Digital Security holder can sell the product on the regulated market on which it is listed, or in accordance with (and subject to) the terms of the Prospectus, may redeem the securities directly with the Issuer in return for an amount of Tezos equal to the aggregate Coin Entitlement of the Digital Securities (less relevant fees and costs) or, in certain limited circumstances, for an amount in US dollars equal to the net proceeds of sale of the aggregate Coin Entitlement (less relevant fees and costs). The Issuer may, at any time, determine that all Digital Securities are to be redeemed compulsorily in accordance with (and subject to) the terms of the Prospectus.
Objectives	This product is designed to offer investors a means of investing in Tezos without having to acquire Tezos themselves and to enable investors to buy and sell exposure to Tezos by trading of a security on a regulated European stock exchange. The Digital Security is backed and secured by Tezos.
Intended Retail Investor	The product is intended for investors who intend to form and / or optimize assets in general and have an investment horizon in line with the recommended holding period stated below. The product is designed for investors with informed knowledge and / or experience with financial products who are able to bear a total loss of their investment and do not attach any importance to capital protection.

What happens if CoinShares Digital Securities Limited is unable to pay out?

Although the product is secured with Tezos, investors bear the risk that the Issuer may not be able to fulfil its obligations in relation to the product. For example, in the event of the Issuer's insolvency. The Issuer has no other business activities except to issue Digital Securities that provide exposure to a single type of underlying digital asset. In the case of default by the Issuer the assets it holds as collateral may be realized to meet its obligations and the cash proceeds will be paid in accordance with a priority order applicable to the product. The cash proceeds may not be sufficient to meet all obligations and make all payments due in respect of the securities. In these circumstances you may not be able to realise the full value of your securities and you will suffer a loss on your investment. A total loss of invested capital is possible. The product is not covered by an investor protection or guarantee scheme.

What are the costs?

Key information document

CoinShares

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Cost over time:

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return).
- USD 10,000 is invested.

If you exit after 1 year
